# What is RSS and an RSS feed?

**RSS** ( $\underline{R}$ eal  $\underline{S}$ imple  $\underline{S}$ yndication or  $\underline{R}$ ich  $\underline{S}$ ite  $\underline{S}$ ummary) is a format for delivering regularly changing web content <u>automatically</u>. Many news-related sites, weblogs and other online publishers deliver their content as an **RSS Feed** to as it becomes available.

Quick, automated information delivery enables the recipient to be more knowledgeable and competitive due to possessing what they need in a timely manner. Consequently, you are often requested to sign up for a desktop "Reader" so that the feed information can be delivered directly to your own computer in an organized fashion.

In addition, choosing an appropriate feed search phrase can not only be useful but also lead to life-saving discoveries. See the Feed Phrase Examples below for ideas.
